

WHY CHOOSE A DIAMOND DOOR?

BUILT FOR QUALITY

Customer satisfaction is our measure of success - that's why we ensure that every door is built to the highest standard. From manufacturing materials and processes, design, and delivery, we build your door to last.

EASY DOOR INSTALLATION

Diamond Doors assembles your hangar door before shipping it directly to your building site. Your door is ready to be hung on your hangar as soon as it arrives, saving you time and costs on installation.

DOOR SUPPORT AND SERVICE

Our service team is available to provide door installation support at every step. We also have digital resources on hand to further simplify your door maintenance experience.

EXTENSIVE DOOR WARRANTY

We stand by the quality of our doors, offering a comprehensive two year manufacturing warranty, a ten year lift cable guarantee, and a lifetime warranty on hinge bushings. You can rest assured your door will last the lifetime of your building.

NOT SURE ABOUT INSTALLATION?

While we've made installation as simple as possible, we know that it can be time consuming. At Diamond Doors, we have a wide dealer and installer network ready to help. Contact our sales team to ask about local companies in your area who offer outstanding service.

MORE TIME FOR WHAT YOU LOVE

Diamond doors are designed by pilots and built for pilots. We know the feeling of taking to the skies and we want to make sure you can do the same. That's why we build low maintenance, high quality hangar doors that last a lifetime - to give you more time for what you love.

LOW MAINTENANCE FEATURES

Save time and money with a hangar door designed for easy maintenance. Carefully manufactured with close attention to detail, we include features like greaseless hinges, an industry leading locking system, and an onboard electrical diagnostic system to make your door as trouble-free as possible.

CONVENIENT DOOR OPERATION

Diamond Doors sets industry standards. With push button operation and a reliable design, you can trust your Diamond door to open when you need it to open. We believe that a door shouldn't be another piece of equipment to look after, but a tool that makes your life simpler.

FULLY CUSTOMIZED FOR YOUR BUILDING

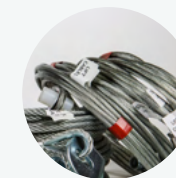

We ask detailed questions to ensure that your door is built to fit your building and your needs. With a wide range of features and options like windows, pedestrian doors, steel header and support columns, and speed increase packages, your door is designed with your hangar in mind.

AUTO-LOCK AND REMOTE OPENER

An easy upgrade from the single-lever locking system, the auto-lock system allows your door to open with the press of a single button. When paired with the remote opener package, your building becomes fully accessible from the seat of your cockpit. This feature is especially convenient in cold and wet weather.

DURABLE LIFT CABLES

We use specialized cables with a fine weave and fiber core for an exceptional lifespan. With our unique system that provides an offset of the cable during lift, our cables never overlap - which is the primary cause of shortened cable life. They are not affected by wind, wrap consistently, and are low maintenance.

COMPLETE INSULATION PACKAGE

Diamond Doors offers a complete insulation package in two inch or three inch thickness depending on the needs of your building. It is easily installed on the exterior of your door frame and provides a full thermal break. Our insulation package reduces your energy costs and keeps your hangar at a comfortable temperature all year.

WINDOWS AND POLYCARBONATE

Customize the look of your hangar with our window and polycarbonate sheeting options. Windows are available in a standard 36" x 18" PVC frame, while polycarbonate sheeting can be customized to fit almost any door size. Both options allow plenty of natural light into your hangar and are easily installed.

MORE FEATURES AND OPTIONS

- High Wind Protection
- Self Supporting Header
- Custom Cut Corners
- Pedestrian Doors
- Opener Speed Increase Package
- Prewired Genesys Electrical Box
- Mounting Hardware Kit
- Photoelectric Safety Sensors
- Emergency Manual Opener
- Custom Finishing Options

“After two years of enjoying the new door, I am completely satisfied and regretting only of not having made the investment sooner! It has worked flawlessly during both winter and summer and in between. This door has extended my flying hobby by many years, not having to wrestle with a large door every time I use my airplane.”
