

AGRICULTURAL BIFOLD DOORS

QUALITY DOORS SINCE 1998

MORE TIME FOR WHAT IS IMPORTANT TO YOU

Diamond doors are designed for versatility and low maintenance. Whether that's retrofitting an existing quonset with a bigger door, ordering for a new cold storage building, upgrading your barn door, or anything else you can think of, Diamond Doors is here to make that possible.

LOW MAINTENANCE FEATURES

Save time and money with a new shop door designed for easy maintenance. Carefully manufactured with close attention to detail, we include features like greaseless hinges, a reliable locking system, and an onboard electrical diagnostic system to make your door as trouble-free as possible.

CONVENIENT DOOR OPERATION

Diamond Doors sets industry standards. With push button operation and a reliable design, you can trust your Diamond door to open when you need it. We believe that a door shouldn't be another piece of equipment to look after, but a tool that makes your life simpler.

MAXIMIZE YOUR CLEAR OPENING

Retrofitting your existing shop with a new bifold door allows you to increase the size of your clear opening. Unlike an overhead door that takes up space inside your building, or sliding doors that take up yard space, a bifold door maximizes the potential of your shop and yard.

SELF SUPPORTING HEADER SYSTEM

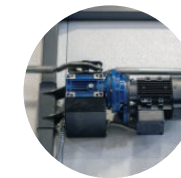

The Diamond Doors self-supporting header system allows your door to extend past the roofline of your building, creating a larger clear opening for your equipment to fit through. This system also provides extra structural support on buildings that can't handle the weight of the door on their own, saving time and money when retrofitting your shop building.

DURABLE LIFT CABLES

We use specialized cables with a fine weave and fiber core for an exceptional lifespan. With our unique system that provides an offset of the cable during lift, our cables never overlap - which is the primary cause of shortened cable life. They are not affected by wind, wrap consistently, and are low maintenance.

AUTO-LOCK AND REMOTE OPENER

An easy upgrade from the single-lever locking system, the auto-lock system allows your door to open with the press of a single button. When paired with the remote opener package, your building becomes fully accessible from the seat of your cab. This feature is especially convenient in cold or wet weather.

WINDOWS AND POLYCARBONATE

Customize the look of your hangar with our window and polycarbonate sheeting options. Windows are available in a standard 36" x 18" PVC frame, while polycarbonate sheeting can be customized to fit almost any door size. Both options allow plenty of natural light into your hangar and are easily installed.

MORE FEATURES AND OPTIONS

- High Wind Protection
- Custom Finishing Options
- Opener Speed Increase Package
- Pedestrian Doors
- Custom Cut Corners
- Prewired Genesys Electrical Box
- Mounting Hardware Kit
- Photoelectric Safety Sensors
- Emergency Manual Opener

The wind tore my sliders off of my 60 x 40 shop. Best thing that ever happened. I replaced them with a Diamond Door. Easy DIY install with great support. Always opens and closes.

WHY CHOOSE A DIAMOND DOOR?

BUILT FOR QUALITY

Customer satisfaction is our measure of success - that's why we ensure that every door is built to the highest standard. From manufacturing materials and processes, design, and delivery, we build your door to last.

EASY DOOR INSTALLATION

Diamond Doors assembles your bifold door before shipping it directly to your building site. Your door is ready to be hung on your shop as soon as it arrives, saving you time and costs on installation.

DOOR SUPPORT AND SERVICE

Our service team is available to provide door installation support at every step. We also have digital resources on hand to further simplify your door maintenance experience.

EXTENSIVE DOOR WARRANTY

We stand by the quality of our doors, offering a comprehensive two year manufacturing warranty, a ten year lift cable guarantee, and a lifetime warranty on hinge bushings. You can rest assured your door will last the lifetime of your building.

NOT SURE ABOUT INSTALLATION?

While we've made installation as simple as possible, we know that it can be time consuming. At Diamond Doors, we have a wide dealer and installer network ready to help. Contact our sales team to ask about local companies in your area who offer outstanding service.

REQUEST A QUOTE

Interested in getting pricing for your new shop door? Our sales team is available over the phone or by email to answer any questions you may have. For an easy online experience, scan the QR code, or visit our website to fill out our digital quote request form. You'll hear back from us within two business days.
